Providing you with the perfect solution to enhance the appearance and security of your premises

Aluminium, Metal & Wooden Gates • Ornate & Bespoke Gates  
Complete Installation Service  
Parts, Service & Repairs • Maintenance Contracts

# Welcome to Autogate

A manual gate, for the majority of the time, will be left open. The opposite is true for an automatic gate, adding security and safety to your home or work premises. Once you have made the decision to invest in an automatic gate system and have contacted us, we will arrange a free site survey at a convenient time and date for you. Most existing gates can be automated subject to their condition. Some changes to the gates or posts may be required to enable conversion.

All new gate systems supplied and fitted by Autogate are of the highest quality and are available in a range of design styles and materials. With our bespoke service gates can be manufactured to include names and decoration specific to your property.

Gates can be automated to swing or slide open, either as a single gate or as a pair; the mechanism mounted on the gate or concealed underground, depending on the position and type of gate chosen.

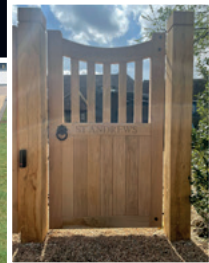

## Why invest in an Automatic Gate from Autogate?

Many insurance companies look favourably on the added security of an automated gate system. Additionally the safety of pets and children is increased as you control the road access to your property.

A number of access control solutions can be incorporated into your automated gate system. Audio and video intercoms can be connected to your home, land-line or mobile phone. Keypad entry for visitors and remote controls for residents can be supplemented by timer controls and vehicle induction loops.

Various additional features can be added to ensure the safe, reliable operation of your gates. All supplied gate systems include a manual over-ride and emergency battery backup can be added, as well as photocells (infra-red beams) to avoid accidental gate closure on vehicles or other obstructions. Outdoor lighting, whether general, daylight sensitive or motion detecting are also popular with our customers.

## Maintenance and Servicing

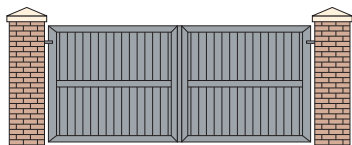

Regular maintenance contracts are available on all of our gate installations and can be personally tailored to your specific needs.

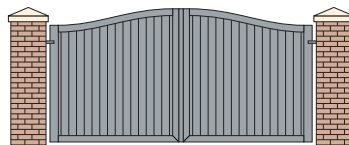

**If a system fails in any way one of our highly skilled technicians will resolve the problem at the earliest possible opportunity.**

## Aluminium Gate Designs

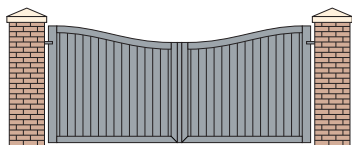

- Can be swing opening or sliding. Additional pedestrian gates available.
- Can be supplied in any RAL colour, and in a variety of wood effects.
- Lower solid planks can be various widths and arranged vertically, horizontally or diagonally.
- Upper open vertical planks can be configured in a variety of space widths.
- Upper open top sections can be any height within the gate design.
- Can have additional bespoke elements included such as a house name (applied by water-jet engraving or on an additional acrylic plate).
